

# Full Service Portfolio

At Alliance we are committed to keeping you and the interests of your company safe. This information represents some of our more specialised capabilities.

## Solutions for Total Security

At Alliance we are committed to keeping you and the interests of your company safe and we offer the following range of services to achieve that aim.

While many of the services we deliver are manpower based, from Security Officers to Investigators, our Security Project Management capability can design and deliver optimised Security solutions encompassing manned security, mobile response, CCTV, remote monitoring, access control systems and other related services.

While we do have partnerships in place we are vendor independent and can ensure that the most appropriate equipment is sourced and procured on the best possible terms.

Alliance can also act as your outsourced Security department, provide contracted security services, or indeed provide you with an in-house Security Manager.

### Manned Guarding

Alliance Security Ltd has been taking care of businesses through the provision of manned guarding services for over 25 years.

We have an enviable staff retention rate and a superb client retention rate that are the real hallmarks of an excellent company.

### Keyholding & Alarm Response

Alliance Security operates a Keyholding & Alarm response service for both commercial and residential properties. Our specially trained Officers will respond to alarm activations day or night, every day of the year.

## Pre-employment Screening

Pre-employment Screening (PES) is a service where Security meets Human Resource Management.

Pre-employment Screening provides a means of protection for your firm by helping to detect hidden adverse history in an applicant's background, expose false claims and identify individuals who may be more susceptible to behave in a way that could harm the reputation and financial well being of your firm.

### Remote Monitoring

With the development of broadband data communications and network video capabilities the Security industry has a new tool - Remote Video Monitoring - that can contribute to a comprehensive Security solution or provide a cost-effective, stand-alone means of protecting your property and assets.

### Other services

Forewarned is forearmed. ARM yourself through specialised services from Alliance Risk Management

We can draw upon specialist knowledge and expertise in the following areas:

### Security policies & procedures

Alliance provides Security policy development services, the goal of which is to formalise the goals, principles, processes and techniques used by an organisation for the achievement of effective security.

## Security auditing, threat analysis, design of security response

Alliance offers services to develop, support and enhance the security structure of an organisation. We can assess your current security set-up, the threats to your business and design, recommend and implement an appropriate solution that meets the needs of your business and the risks facing it.

### Security Training

Employees of an organisation may require Security training in different aspects of Security.

This may be anything from general Security awareness training for a large number of staff or more specialised Security training for specific members of staff to deal with specific types of situations.

# Full Service Portfolio

At Alliance we are committed to keeping you and the interests of your company safe. This information represents some of our more specialised capabilities.

## Business Continuity Planning

Modern life has many ways of throwing things up that can affect our everyday lives. For business however incidents can have more serious implications:

1. 80% of businesses affected by a major incident close within 18 months.
2. 90% of businesses that lose data from a disaster are forced to shut within 2 years. (Londonprepared.gov.uk)

Having a Business Continuity Programme in place demonstrates to employees, clients, suppliers and other stakeholders in your business that their interests are being looked after. It can also assist in protecting your less tangible assets such as brand, reputation and client confidence.

Our Business continuity team at Alliance can work with your organisation to establish a robust framework and plan that your business can then use to demonstrate what and how it will be delivered, key roles and responsibilities and how Business Continuity Management will be governed and reported upon.

### Data Protection

The Data Protection Act means that we all have statutory obligations as to how we manage information we hold on individuals.

Alliance is able to help you comply with requirements you may have under this Act.

This is particularly important for two reasons. Firstly because the Data Protection defines a number of criminal offences for the wrong handling of information that you would not want to unnecessarily subject yourselves to.

Secondly should you require information you hold to be used for evidentiary reasons within the legal process it will need to have been held correctly or it is not likely to be admissible for legal purposes.

## Surveillance counter-measures

With advances in technology an increasing feature of modern corporate life is the use of listening devices and other kinds of surveillance equipment. They are more available, affordable and easier to use than ever before.

These devices can be used by people from those acting on behalf of your competitors to disgruntled employees to obtain sensitive information that could potentially harm your company if used in the wrong way.

Alliance can undertake electronic sweeps of designated areas so that you are safe in the knowledge that no unauthorised persons will hear important discussions and key information regarding your business.

### Corporate Investigations

The Corporate Investigations capability at Alliance can conduct internal and external investigations into all types of adverse activity affecting your business.

Our resource base allows us to take a multi-disciplinary approach where appropriate to handle a wide range of problems you may be experiencing. These may include but are not limited to:

- Internal fraud
- Blackmail
- False Accounting & Money Laundering
- Parallel trading
- Stock manipulation
- Product counterfeiting

### Surveillance

Covert surveillance can be a very useful tool to protect your business interests when used in the right circumstances.

Alliance has a resource base of a number of professional, experienced surveillance operatives.

## Executive Security & Protection

In an ever more volatile and uncertain global business environment executive close protection is increasingly a necessity.

Alliance Security is able to help if your organisation has a need for a professional close protection service that integrates itself effectively and discreetly into your lifestyle or corporate environment.

All operational personnel have relevant backgrounds in the military and hold a depth of experience in commercial close protection.

Our approach ensures that you can live, travel and work with peace of mind.

### Unauthorised occupation of property

As modern living becomes ever more intense people and organisations can, on occasion, find that their property has people occupying it without permission.

Alliance can help you regain your property quickly using legal means.

### Client liaison

From time to time an organisation may become involved in matters that are best dealt with by a third party acting on their behalf with other parties whomever they may be.

Alliance can interface with the various agencies/parties on your behalf and ensure that your organisation is able to achieve the best possible outcome.
